Re: *Written Ex Parte Presentation*
ET Docket Nos. 09-191 and WC Docket No. 07-52

Dear Ms. Dortch:

My company, Grand County Internet Services Inc. provides\, Fixed Wireless broadband service in Grand County Colorado. We rely primarily on unlicensed spectrum to deliver broadband services to consumers that have no [or few] broadband choices. We built our network from scratch using devices authorized under Part 15 rules the FCC adopted to open up 900 MHz, 2.4 GHz, 3.65 GHz and 5 GHz spectrum for unlicensed or light licensed broadband devices. Thanks to the Commission's initiatives; consumers, businesses, and government services in the Grand County Colorado area can now get broadband service. We have provided Fixed Wireless broadband services since 2001. We have invested about \$700,000 in equipment since we started and it has all been self funded. We cannot afford to spend money lobbying you to make changes like the large cellular companies who have now repositioned themselves as wireless. We were providing wireless data services before they even realized they should do it themselves. In fact, we still provide services where their cell towers do not reach.

Grand County Internet Services Inc.is concerned that certain Network Neutrality rules, if adopted, would severely and adversely affect our ability to continue to provide our customers with affordable Fixed Wireless broadband services. It is our understanding that although mobile broadband will have a special set of rules, Fixed Wireless broadband will be lumped in with traditional wired services and be subject to a stricter set of rules. We feel that the Network Neutrality rules imposed on Fixed Wireless broadband should be no more rigid than the rules that will apply to mobile wireless broadband providers. The physics of wireless technology and delivery necessitate a relaxed set of rules for all wireless technologies.

I am not going to reiterate the text that many other WIP's have sent you. I agree with it fully.

Our company supports the positions taken by WISPA, the Wireless Internet Service Providers Association in their Ex Parte presentation filed on December 10, 2010.

Sincerely,

Eden Recor - Owner
